Locate the air screw at the back of the carburetor and adjust the screw using the Phillips-head screwdriver. Turn the screw to the right to lessen the amount of air entering the carburetor and to cause the motorcycle's engine to burn more fuel (since the air-fuel mixture will consist of more fuel).

How to Adjust a Mikuni Carburetor | It Still Runs

When a new Mikuni carb leaves the factory, the floats are almost always set to factory specifications. Working for a Mikuni distributor, I've had the opportunity to open up and examine hundreds of brand new, fresh-out-of-the-box carbs. It is extremely rare to find a new carb not set to factory specs (or close enough to work just fine).
