Social geography is the branch of human geography that is most closely related to social theory in general and sociology in particular, dealing with the relation of social phenomena and its spatial components. Though the term itself has a tradition of more than 100 years, there is no consensus on its explicit content. In 1968, Anne Buttimer noted that "ith some notable exceptions, social geography can be considered a field created and cultivated by a number of individual scholars rather than an

A Geography of Time appears to be an  
account of the differences in how  
different cultures perceive time. While  
the book certainly has some of that, in  
both statistical and anecdotal form, it's  
better to think of this work as a mélange  
of essays on the academic interests of a  
professor who studies time use.

Geography studies the relationships between physical environments and human societies. Many of the most complex global challenges facing humanity – including migration, urbanisation, ageing, socio-economic inequality, and climate change – result from changing human-environment relations, but Geography is the only core academic discipline that treats them in an integrated, interdisciplinary way.
