While all eyes are on Bitcoin, as the cryptocurrency community watches and waits for the asset's next uptrend to begin, another crypto asset has gone parabolic - but not in price. The market cap and total supply of Tether have been skyrocketing more so than Bitcoin price has. Also easily besting Bitcoin, is the amount of Tether transactions on the Ethereum blockchain, potentially demonstrating that the stablecoin is very quickly becoming the cryptocurrency of choice.

How Tether On Ethereum Is Rapidly Becoming The ...

Ethereum's price action has always remained closely tied to that of Bitcoin, although it typically outperforms the benchmark cryptocurrency during uptrends, and underperforms it during downtrends. This trend appears to be shifting, however, as data seems to indicate that the cryptocurrency is now closely tracking the percentage movements seen ...
