Substance Abuse And Addiction Treatment

Can drug addiction be treated? Yes, but it's not simple. Because addiction is a chronic disease, people can't simply stop using drugs for a few days and be cured. Most patients need long-term or repeated care to stop using completely and recover their lives. Addiction treatment must help the person do the following: stop using drugs; stay drug-free

Drug addiction treatment can include medications, behavioral therapies, or their combination. Treatments for prescription drug abuse tend to be similar to those for illicit drugs that affect the same brain systems. For example, buprenorphine, used to treat heroin addiction, can also be used to treat addiction to opioid pain medications.

Addiction Treatment | Programs for Drug & Alcohol Addiction

DRUG ADDICTION TREATMENT Drug addiction treatment functions as a safe haven for the addict, isolating him or her from environmental stresses that create the desire to use. By distancing the addict from work-related pressure, uncomfortable social situations, family conflict, and other potential triggers, the likelihood of relapse in the first stage of recovery is significantly lessened.
